Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 4-7 and 11-13 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claims 4 and 11, the phrase "a type" renders the claim indefinite because it is unclear whether the limitation(s) following the phrase are part of the claimed invention. See MPEP § 2173.05(d).

Applicant is request to reference the specification so that mete and bound can be determined.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1, 2, 8 and 9 are rejected under 35 U.S.C. 102(e) as being anticipated Ludwig et al by U.S. Patent Number 6,487,218.

Art Unit: 2663

Re Claims 1 and 8, Ludwig teaches in fig1, step S3 for receiving LCP packet with masked packets in PPP frame (a plurality of framed data packets); step S5 determines whether Masked Packets are received (detecting...a beginning of said information portion); Step S6 processes the masked packets (determining...configuration information) wherein the masked packets are unframed to determine configuration information of a specific protocol (a predetermined type) (See col. 8, lines 16-34).

Re Claims 2 and 9, it is known that a conventional PPP frame includes a 1-byte frame delimiter flag followed by a variable length information section followed by another frame delimiter flag, wherein the information field includes PPP protocol such as the LCP. Ludwig identifies the LCP packet within the PPP frame to perform link configuration. Since, LCP is identified, scanning of the plurality of framed data packet is inherently implied. Furthermore, it is inherent that after the frame-demarcating character of the beginning of the PPP frame indicates the beginning of the information field.

Allowable Subject Matter

5. Claims 3 and 10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter:

In combination with Claims 1-3 and 8-10, prior art fails to teach "un-escaping contents of a predetermined number of bytes within the information

portion and determining whether the contents of un-escaped predetermined number of bytes includes a predetermined character.
